Allowable Subject Matter

1. Claims 1-5 and 7-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Inoue (US 2004/0217907 A1) discloses an antenna comprising a dielectric substrate in which a plate thickness thereof is configured to be different at each of the regions; and a plurality of flat antenna patterns provided on the each of regions of the dielectric substrate, wherein the plurality of flat antenna patterns each receives or transmits electric waves having different frequency bands respectively. Inoue, however, fails to specifically teach that the dielectric substrate having a plate thickness that decreases from a central region to an annular region.

Claims 2-5 and 7-10 are allowed for depending on claim 1.

Regarding claim 11, Inoue discloses an antenna comprising a dielectric substrate; a first antenna pattern on a first side of the dielectric substrate in the central region; and a second antenna pattern in the first side of the dielectric substrate in the annular region. Inoue, however, fails to specifically teach that the dielectric substrate having a thickness that decreases from a central region to an annular region.

Claims 12-17 are allowed for depending on claim 11.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent 6,014,114 discloses an antenna comprising antenna patterns disposed dielectric substrates that extends from a central region.
